Flooring America® Flooring Canada®

Where Friends Send Friends™

We look forward to
helping you turn your
decorating dreams
into reality!

Whether you're looking for carpet that indulges your feet, expresses your personality, or is built to withstand the demands of your active family, we have what you're looking for. Flooring America offers luxury, style, performance, and value.

We look forward to guiding you through the carpet fibers, types, and warranties that meet the demands of your lifestyle.

Carpet Types

PLUSH OR CUT-PILE Loops trimmed off with yarn bundles standing straight up. Repeated pre-shearing creates a luxurious appearance. A great 'whole house' carpet, medium durability. Popular varieties include saxony plush: short, densely packed tufts; textured plush: decoratively versatile, textured surface helps hide footprints and vacuum marks; velvet plush: lightly twisted cut-piles with a uniform color and luxurious appearance that's ideal for formal areas.

BERBER LOOP-PILE High, closed level loops stand upright, creating a nubby, rugged texture that looks natural and handcrafted. Tight loop texture helps hide foot and vacuum marks. Uncut loops tend to wear better than cut-pile.

BERBER CUT-PILE Newer berber look with color and interest of traditional loop berbers and the great plush feel of thick, cut-pile carpet. Very versatile. Ideal for casual rooms and kids rooms. Subtle color flecks help hide soil.

CUT-&-LOOP PILE combined cut and looped fibers provide a variety of surface textures or carved/sculptured effects for medium durability. Multiple colors and levels hide dirt and footprints in formal or informal areas. Also available in solid colors.

COMMERCIAL LOOP Versatile styles in a durable, long-wearing surface pile engineered for high-traffic areas. Captivating color choices and textured surfaces suitable for professional and practical installations.

Fiber Types

SYNTHETIC FIBERS

NYLON Considered the most versatile fiber. Durable, excellent soil resistance, less costly than wool but one of the most expensive of synthetics. Can be damaged by prolonged exposure to sunlight.

POLYESTER Softer, slightly less durable, and less expensive than nylon. The softer fiber accepts dyes well, making brilliant colors possible. Stain resistance superior to other, more popular fibers.

POLYPROPYLENE (OLEFIN) Extremely durable, colorfast, absorbs no moisture, with superior stain resistance. Ideal for loop pile carpets, also made into ribbon-type yarn used in outdoor carpet. Low cost, limited colors.

ACRYLIC Resembles wool more than other synthetic fibers and resists fading.

NATURAL FIBERS

WOOL Comfortable, durable, naturally beautiful, and generally considered the 'ultimate' fiber. Soil-resistant, but set-in stains may be difficult to remove. More expensive than synthetics.

SISAL Made from fiber derived from the agave plant. Stronger and more durable than other natural fibers, earthy and rough-textured like jute. Sisal carpets usually contain jute, hemp, sea grass, and coconut fibers.

SEA GRASS Adds a wonderful natural look and feel to any room. Can be damaged by chemicals and is susceptible to mold and insects.

COIR Extracted from the husks of coconuts, coir is one of the most environmentally-friendly fibers. Tough, hardwearing, and versatile, with natural aesthetic appeal. Rich and bold textures. Often blended with sisal.

Types of Carpet Cushion

Carpet cushion extends the life of your carpet. By reducing pile-height loss and pile crushing, carpet cushion can help keep a carpet looking new and thereby stretch its usable life span. In addition, cushion imparts resiliency and resistance to pressure, which contribute to a carpet's feeling of luxury. And with cushion, it is possible to select the degree of luxury or firmness of tread you desire.

Most are available in varying weights, densities, and thicknesses to accommodate your desired feeling underfoot and level of traffic.

FOAM

PRIME Similar to the type of cushion used in furniture, mattresses, and car seats; recommended for light to moderate traffic.

BONDED OR REBONDED Made from recycled foam; most often features a surface net for easy installation and improved performance.

RUBBER

WAFFLED A soft, resilient cushion with a luxurious feel.

FLAT A firm, dense cushion often used in large commercial applications and with loop carpet.

Five Star Selection System

The Five Star Selection System is an independent rating system designed to guide you in choosing the right floor for your needs. These stars indicate levels of performance and durability to ensure your satisfaction. Look for the Star Rating on all product labels.

 **ULTIMATE** Five Star ratings are awarded only to the best products in their category. These carpets are all performance tested to give you quality that surpasses the toughest industry standards.

 **PREMIUM** The Four Star collection offers a high level of performance. These carpets give you the high standard of luxury and performance you desire. The Four Star combination includes extended performance warranties.

 **BEST** Our Three Star group offers the broadest selection of performance-tested carpets meeting high standards for durability critical to busy families. These products feature a wide selection of nationally known brands.

 **BETTER** The Two Star group contains an impressive array of quality carpets, in a wide range of colors for any room. The collection offers a good value where performance is desired but where budget restraints are also important.

 **GOOD** One Star carpets are the most economical solution where price is key. This basic product combination offers the minimum level of performance at very affordable prices.
